SIRIM STANDARD

SIRIM Berhad is a premier total solutions provider in quality and technology innovations that helps industries and businesses to compete better through every step of the business value chain.

SIRIM Berhad is the centre of excellence in standardisation, facilitating industries and businesses in enhancing their production and competitiveness, protecting consumers' health and safety, and giving them the choice for quality products and services.

As a standards development organisation, SIRIM Berhad has extensive expertise in standards research and consultancy which helps industries and businesses to meet local and international requirements and practices, through the development of SIRIM Standards.

SIRIM Standards are developed according to SIRIM standardisation procedures, which are in line with international practices that ensure appropriate notification of work programmes and participation of interested parties. SIRIM Standards are developed through consensus by committees, which consist of experts in the subject matter. The use of SIRIM Standards is voluntary, and it is open for adoption by regulators, government agencies, associations, industries, professional bodies, etc.

SIRIM 10:2017

Foreword

This SIRIM Standard was developed by the Project Committee on Green Logistics established by SIRIM Berhad.

This standard was developed with the following objectives:

- a) reducing fuel emissions;
- b) enhancing fuel efficiency;
- c) improving road safety;
- d) reducing freight-related carbon footprint; and
- e) gaining greater industry intelligence and networking opportunities.

This standard does not override or increase requirements specific to laws and regulations. However, to the greatest extent practicable, this standard **should** be considered by organisations involved in the transport business where both economic and environmental efficiencies can be gained.

Compliance with this standard does not by itself grant immunity from legal obligations.
